SUMMARY

MCA student and full-stack developer with hands-on experience building AI-powered applications, including a Retrieval-Augmented Generation (RAG) document Q&A system and an AI-driven resume analysis tool using LLM APIs, alongside strong MERN stack experience from a professional React Developer internship at Chetu. Proficient in building scalable, production-ready web applications and integrating modern AI capabilities into real-world products.

EDUCATION

Institute of Engineering and Technology

Master of Computer Applications

Lucknow, India

2025 – 2027

I.T.S Mohan Nagar

Bachelor of Computer Applications

Ghaziabad, Uttar Pradesh

2021 – 2024

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL

Frontend: React.js, Tailwind CSS, Styled Components, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

AI/ML & Data: LangChain, FAISS, RAG, GenAI, Hugging Face

Databases: MongoDB

Tools: Git, GitHub, Postman, VS Code, Chrome DevTools

EXPERIENCE

React Developer Trainee

Jun 2024 – Nov 2024

Chetu

Noida, UP

- Developed and maintained dynamic UIs using React.js, focusing on performance optimization and modular architecture.
- Built reusable components and implemented client-side routing, custom filters, and sorting logic for scalable product interfaces.
- Participated in agile development cycles, utilized Git and GitHub for version control, and contributed to code reviews.

PROJECTS

ResumeAI – AI-Powered Resume Analyzer | *React, Node.js, Google Gemini API* | **GitHub** | **Live**

- Built a full-stack application powered by Google Gemini AI that analyzes resumes against job descriptions, generating an ATS compatibility score, keyword matching, and skills gap analysis.
- Implemented AI-powered resume rewrite suggestions, interview preparation content, and automated cover letter generation using LLM prompting.
- Designed a full-stack pipeline handling document parsing, prompt engineering, and structured response rendering for an end-to-end user experience.

QueryDoc – RAG-based Document Q&A System | *LangChain, FAISS, LLM API, React* | **GitHub**

- Built a Retrieval-Augmented Generation (RAG) pipeline enabling users to upload PDFs and ask natural-language questions, with source-cited answers grounded in the original documents.
- Implemented document chunking, embedding generation, and semantic similarity search using FAISS, integrated with an LLM API for answer generation.
- Designed an adaptive retrieval strategy adjusting chunk size and top-k retrieval based on document length for accurate responses across varying document sizes.

Job Portal Web App | *MERN Stack* | **Live**

- Built a full-stack job portal with sign-up/login, application status tracking (new/selected/rejected), and a recruiter dashboard.
- Integrated a REST API-based backend with a React frontend using the MERN stack.

Jeena Store – Frontend E-commerce | *React, Styled Components* | **Live**

- Developed a product listing page with filter/sort functionality, cart logic, and a fully responsive layout.
